

VACANCY

## Electronic Technician - Aberdeen

As an Electronic Technician, you will primarily be responsible for assembling and testing electronic PCB assemblies using basic test equipment. There will also be a requirement to assist in the final assembly of finished units. Work will be carried out to the company's quality standards and on time. You will play a crucial role in our production processes, ensuring the efficient and accurate completion of tasks.

### Key Responsibilities //

- Assemble and test PCBs following work instructions with aid of computer-based software and practical skills
- Soldering through hole and surface mount components
- Assisting in final assembly of products
- To always produce high quality work and be capable of working to deadlines
- Adhering to Health & Safety regulations
- Reporting problems
- Occasional report writing

### Skills & Qualifications //

- Electronics assembly experience preferred or relevant experience in this field
- Soldering experience preferred
- Excellent communication skills
- Exceptional attention to detail
- Ability to work well as part of a team
- Proficient in Microsoft Word and Excel

### Benefits //

- 35 Hour Week
- Flexible Working
- 9 Day Fortnight
- Company Pension
- Private Health Care
- Free on-site company parking
